

Mission Statement:

To implement and support strategies promoting healthy choices that prevent addictions and address related concerns.

The Onondaga Council on Alcoholism/Addictions, Inc. d.b.a. Prevention Network:

One of the oldest such Councils in New York State and in the entire country. Its roots grow back to Marty Mann and the national effort to bring forth community services to initially address the issue of alcoholism. Being a community-based private not-for-profit (501 c 3), the Council has been able to grow to meet community needs. Services have expanded from treatment to education, prevention and recovery, inclusive of a variety of substances and also into behavioral addictions such as gambling, food, and sex.
