

What They Believe:

The National Council on Alcoholism and Drug Dependence of East San Gabriel & Pomona Valleys believes alcoholism/drug addiction is a disease, as defined by the American Medical Association. Although progressive, and often fatal, the disease of alcoholism/drug addiction is treatable. Early detection is the key to successful treatment of any illness and alcoholism/drug addiction is no exception.

The Mission:

The mission of the National Council on Alcoholism and Drug Dependence (NCADD) is to reduce the incidence and prevalence of the disease of alcoholism, other drug addiction diseases and related problems. In the pursuit of this mission, NCADD seeks to:

- Prevent the disease of alcoholism, other drug addiction diseases and related problems.
- Educate the public about alcoholism, other drug addictions and related problems.
- Encourage the proper diagnosis, treatments and continuum of care for individuals and families with alcoholism, other drug addictions and related problems.
